

Broadband Anywhere - No Phone Line Required.

If you're in our UK, Ireland and European Service Zones and can install our dish with a clear view of the southern sky you can get our broadband service. It's compatible with any computer that has a network connection and with a router you can even share the service on multiple computers.

We use SES, Europe's leading provider of satellite services, to deliver ASTRACONnect via their ASTRA satellites. Not only can you experience the same reliability as Sky TV but you can also receive Sky or Freesat from the same dish. With the VOIP option, you can even use a UK VOIP service over the satellite connection.

- Satellite latency typically 550-850ms
- Now in Ka for 20Mbps. See website for European Service Zones in Ka and Ku
- UK fixed IP for access to UK websites and services
- High speed connection direct to European backbone

Find a Retailer or order online at www.satelliteinternet.co.uk or call **03333 447700** for sales or any questions. We're here to help!

Satellite Internet is a member of:

Consumer Credit Licence 662881 Consumer Credit Act 1974

A detailed Service Package Description is available for all packages. All prices include VAT at UK rate of 20%

Unique ValuePlus Tariffs

Our unique ValuePlus tariffs deliver an unbeatable combination of speed and 'always-on'.

- ValuePlus (V+) gives a set monthly data traffic amount for download and upload. That's the 'Value'.
- After the set amount is used, you stay online at the follow-on speed up to 256kbps. That's the 'Plus'.
- VOIP option at £7pm for compatible VOIP telephony providers

FreeZone - Unlimited Overnight Data Option

FreeZone delivers overnight unlimited data at best effort speeds. Use a download manager or schedule large files like video, audio and software into the FreeZone time zone (11pm - 7am UK time) and you're not using your daytime data.

Data Reset

If you need more data, just reset your usage figures any time during the month for around 60% of your monthly subscription.

Package Service Speeds

The speeds given are "up to" max speeds of the satellite connection. As with all internet services, actual speed achieved depends on site visited and internet and network congestion.

*Go Extra Large with the 20MXL Free GB

The 20MXL plan has no overall monthly data cap and a stepped slow-down as you use more data. There's 40GB of download on the first step plus FreeZone's unlimited overnight data.

Service Zones

For maps and European coverages, please see our website FAQ.

Zones 1, 2 & 5 – Standard for new accounts. Full Ka coverage for UK and Ireland with upload up to 2Mbps. Data and options as main table. Performance may be limited at beam edge.

Zones 3 & 4 – Ku coverage for TV compatible installs, some mobile and legacy equipment. Max upload up to 356kbps.

| Ku Zones 3&4 per month | 4M3 ValuePlus £15.95 | 10M5 ValuePlus £24.95 | 10M10 ValuePlus £29.95 |

Our front-line team are here to help!

Rent or Buy as you prefer

| Equipment cost for a new | 1 Year contract | 30 day notice |
|--------------------------|-------------------------|---------------|
| Terminal Equipment Set | £229 | £269 |
| Or Rent on a | 2 Year minimum contract | |
| Terminal Equipment Set | only £12.50 per month | |

The Terminal Equipment Set includes:

- ✓ 75cm dish with Az/El mount
- ✓ Satmodem
- ✓ 30m RF cable
- ✓ 240v UK mains power supply
- ✓ Transceiver / iLNB
- ✓ Ethernet Cable
- ✓ CD includes install video, user guide and manual

You will need in addition:

- ✓ Installation
- ✓ Appropriate 60mm mount
- ✓ Cable Clips
- ✓ Cable Ties

All new customers qualify for a subsidised equipment set with a new account and contract (normal price is £450). Your equipment could be as low as £229 to buy or just rent for £12.50pm.

As you'd expect, there are conditions. You can't end your contract early or downgrade without early termination or downgrade charges. You can add options or upgrade as you wish.

Rental

Rental requires 2 year minimum contract. At the end of the rental contract, you can buy the equipment for £25 and move to any contract available at that time.

Flexible Installation options: get a pro, go local or DIY

Your local Retailer/Installer is a great place to start for advice on installations. Enter your Postcode in "Find a Retailer" on our website. Or you can opt for our national service or even DIY. There is a video guide and installation manual in the FAQ section online.

For the national service a "standard" installation covers a 30m cable run from the satmodem to the dish mounted on a south-facing wall without needing special-access requirements, no higher than first storey and only needing one wall to be drilled. There may be extra costs if your location is difficult to get to or not on mainland UK.

My Account Dashboard

Unique to Satellite Internet, our customer "My Account" dashboard gives you easy access to your account and invoices. You can see your up-to-date data usage and signal levels. There's a direct support form and webmail panel. You can view your orders, upgrade and check your payment details. Everything, in fact, to make managing your account with us simple, easy – and online.

Find Out More and Get Online

- ✓ Order from your local Retailer / Installer
- ✓ Order online at www.satelliteinternet.co.uk/packages
- ✓ Call 03333 447700 9-6 Mon-Fri, 10-6 Sat
- ✓ email sales@satelliteinternet.co.uk

Don't delay - you could be online within days!
